(BgVV recommendation XXI)**

approved

Supply Form

20 kg in PE-bags

Storage Stability

in originally sealed package
in cool and dry places

min. 1 year

Application

For white or pastel coloured articles based on general purpose rubbers, especially for extruded sections. Hansa O imparts the best dimensional stability of all factices and has only slight influence on compression set. Vulcanizates containing Hansa O are less resistant against swelling in water than those containing Corona R.
